PROFESSIONAL SUMMARY

AI/ML Engineer with hands-on experience building and deploying Machine Learning and Deep Learning models, LLM-powered applications, and Retrieval-Augmented Generation (RAG) pipelines. Proficient in Python, PyTorch, Scikit-learn, FastAPI, and vector databases (FAISS/Chroma). Experienced in model development, prompt engineering, and end-to-end AI workflow design, with a track record of improving model accuracy and reducing latency in production-style systems.

PROFESSIONAL EXPERIENCE

AI/ML Intern, Aspire Softserv Pvt. Ltd.

Feb 2026 – Present | Ahmedabad, India

- Contribute to AI/ML projects involving database integration, backend API development (FastAPI), and system performance optimization.
- Implement Retrieval-Augmented Generation (RAG) pipelines using FAISS/Chroma, text embeddings, and LLMs to build context-aware response systems.
- Develop workflow automation solutions using n8n to streamline business processes and integrate AI-powered services.

Data Engineering Intern, SAP & Edunet Foundation

May 2025 – July 2025 | Remote

- Worked with SAP HANA Cloud and SAP Business Technology Platform (BTP) to design and deploy data pipelines.
- Designed and implemented data models and provisioned datasets for analytics use cases.
- Performed data cleaning, transformation, and analysis using Python and Pandas, enhancing dataset quality and analytics readiness.

PROJECTS

HR & Recruitment Contact Intelligence Platform

- Architected a full-stack contact intelligence platform automating HR contact discovery and verification across 100+ company domains.
- Built a zero-hallucination verification engine using RFC 5322 validation, DNS MX lookups, and async SMTP probes, eliminating fabricated emails via deterministic confidence scoring.
- Engineered an async multi-stage crawler (HTTPX, BeautifulSoup4, Playwright) with NLP context classification, boosting extraction success on JS-heavy sites by 45% at sub-2s latency.

Enterprise Multi-Agent RAG Assistant

- Developed a Multi-Agent RAG system with Retriever, Generator, and Critic agents, improving response accuracy and relevance.
- Implemented document ingestion, semantic search, hybrid retrieval, and response generation, reducing hallucinated outputs by 55%.
- Designed and developed scalable AI orchestration workflows using vector databases and LLM pipelines, improving retrieval performance and contextual response quality by 70%.

AI-Powered Story Generator

- Built a privacy-preserving Streamlit web application for AI-based short story generation using user prompts, reducing response generation time by 40%.
- Implemented Hugging Face text-to-image models to generate illustrative visuals with over 90% prompt relevance accuracy.
- Content generation was fully privacy-preserving – no user images or identifiable information required.

SKILLS

AI/ML: Machine Learning, Deep Learning, Neural Network, XGBoost, NLP, LLMs, RAG, Fine-Tuning, Prompt Engineering, Model Evaluation, Automation

Frameworks & Libraries: PyTorch, Scikit-learn, Langchain, LangGraph, Hugging Face Transformers, n8n, Pandas, NumPy

Cloud & MLOps: Docker, Kubernetes, Git, GitHub

Vector Databases: FAISS, Chroma

APIs & Deployment: REST API, Streamlit, FastAPI

EDUCATION

B.E. in Computer Science & Engineering (AI/ML Minor)

CGPA: 8.93/10

R. N. G. Patel Institute of Technology, Bardoli, Gujarat, India — 2022 – 2026 | Bardoli, Gujarat, India

Higher Secondary Certificate

63%

R.G.A.S. High School, Vapi, Gujarat, India — 2020 – 2022 | Vapi, Gujarat, India

CERTIFICATIONS

- Python for Data Science and AI – IBM (2025)
- Python Data Analytics – Meta (2025)
- Data Analysis with Pandas and Python – Packt (2025)
- GenAI-Powered Data Analytics Job Simulation – TATA Group (2025)
- Data Analytics Job Simulation – Deloitte (2025)
- Python Programming – SAP × Edunet Foundation (2024)
